*A success story of more than 35 years
that does its job passionately...*

Şampiyon Filter was established in 1985 as a small family business in Iskenderun. Taking the name "Şampiyon" from its main principle of "Success in Filtering" since its foundation, our company transformed into a bigger family with more than 35 years of experience; continues to produce high quality oil, fuel, air and hydraulic filters for automotive, agricultural, construction equipment and commercial bus and truck groups in accordance with national and international standards.

The main starting point for all activities that sustain the Şampiyon understanding of the "Advanced technology and quality of service with continuously rising" Based on the vision has become Turkey's first and only R & D-based filter manufacturer title.

What makes Şampiyon Filter successful and different is that it acts with the principle of "Your Reliable Partner" by transferring all the values and family culture approach inherited from its founders to all its employees and business partners. Based on this approach, it is proud to be among the most respected companies in the Automotive Sub-Industry Sector and to serve with an increasing responsibility in the domestic and foreign markets.

With ISO 9001 quality system assurance certificate, TSE certificate of conformity to production and IATF 16949 certificate obtained in 2007, advanced machine park, superior mold technology, modern production and management understanding, experienced engineer staff, fully-fledged modern laboratory facilities and thanks to the effective quality assurance system, strengthening its position in the international arena that performs export to 75 countries outside of Turkey, on a global scale.

Şampiyon Filter will continue to be your "Reliable Partner" in the future by continuing the family culture heritage from its founders to the endless quality it has set out in line with its own goals and principles, adding new successes to the reliability and quality of the service it offers.

We are proud to be the "Champion of Years and Roads!".

1985

Şampiyon Filter, with its expert engineers who are experienced in their fields, aims to improve the technology, new products, processes and services in the filter industry. The main goals of Şampiyon Filter's R&D Department are to guide design management by accepting the results of the market researches as the input and to provide steady and consistent growth.

Our R&D Department conducts research projects in order to develop innovative solutions to achieve worldwide product and production technologies. Our company provides the best quality filters in the shortest possible time by performing design verifications in our laboratories and offers the best quality with highest performance by modernizing the machinery.

Our manufacturing defect monitoring systems developed by R&D allows our final products to function with high performance and trouble-free. Being the technological leader of the sector, Şampiyon Filter's new goals will take the quality objectives of the sector to the next level.

Şampiyon Filter, considering innovative and efficient design techniques and customer demands, is focused on analysis and optimisation, physical verification and test methods, advanced/new material technologies. Our R&D Team examines each and every design input starting from the design phase to the market entry of the final product. We continue to monitor the product even after the product is on the market in order to maintain the highest level of product performance and customer satisfaction.

Our R&D Department helps to attain to goal of economic globalisation by encouraging innovation, creativity and competitiveness in parallel with the advancements in the field of "ICT – Information and Communication Technologies".

R&D

1985

The foundation of which was laid in Iskenderun in 1985, Şampiyon Filter continues to produce oil, fuel, air and hydraulic filters for automotive, agriculture, construction equipment and commercial bus and truck groups in accordance with national and international standards.

Since its foundation, our company, whose basic principle is "Success in Filtering", has been the starting point of its activities, service with advanced technology and constantly rising quality understanding.

Şampiyon Filter, aiming to be your "Reliable Partner" by being among the leading and reputable companies in the automotive sub-industry sector, not only serves Turkey but also the whole world with its advanced machine park, superior mold technology, modern production and management understanding, qualified staff from workers to engineers, full-fledged wide and modern laboratory facilities and effective quality assurance system.

Şampiyon Filter has brought its social contribution, environmental awareness and leadership in the sector. With its dynamic staff, with the awareness of its responsibility, from the past to the future continues its quality development.

Our company, which has ISO 9001 quality system assurance certificate and TSE certificate of conformity to production, will continue to serve with greater responsibility in the domestic market with the IATF 16949 certificate received in 2007.

In line with its goals and principles, Şampiyon Filter continues to be your "Reliable Partner" by adding new successes to the reliability and quality of the service it provides on the journey to endless quality.
